Eggboard

Artemide®

Eggboard

Giacobone & Roj - Progetto CMR 2014

Eggboard is a resounding innovation, offering an efficient lighting solution with sound-absorbing properties. The intelligent fabric minimizes sound reflection and echo in a space, a feature that makes a difference in open spaces, especially in workspaces. Crafted of PET, a high quality material molded into a shape inspired from cardboard egg packaging, Eggboard is available in various colors, bringing a design accent to any office or commercial space. Crafted of PET, a high quality material molded into a shape inspired from cardboard egg packaging, Eggboard is available in various colors, bringing a design accent to any office or commercial space.

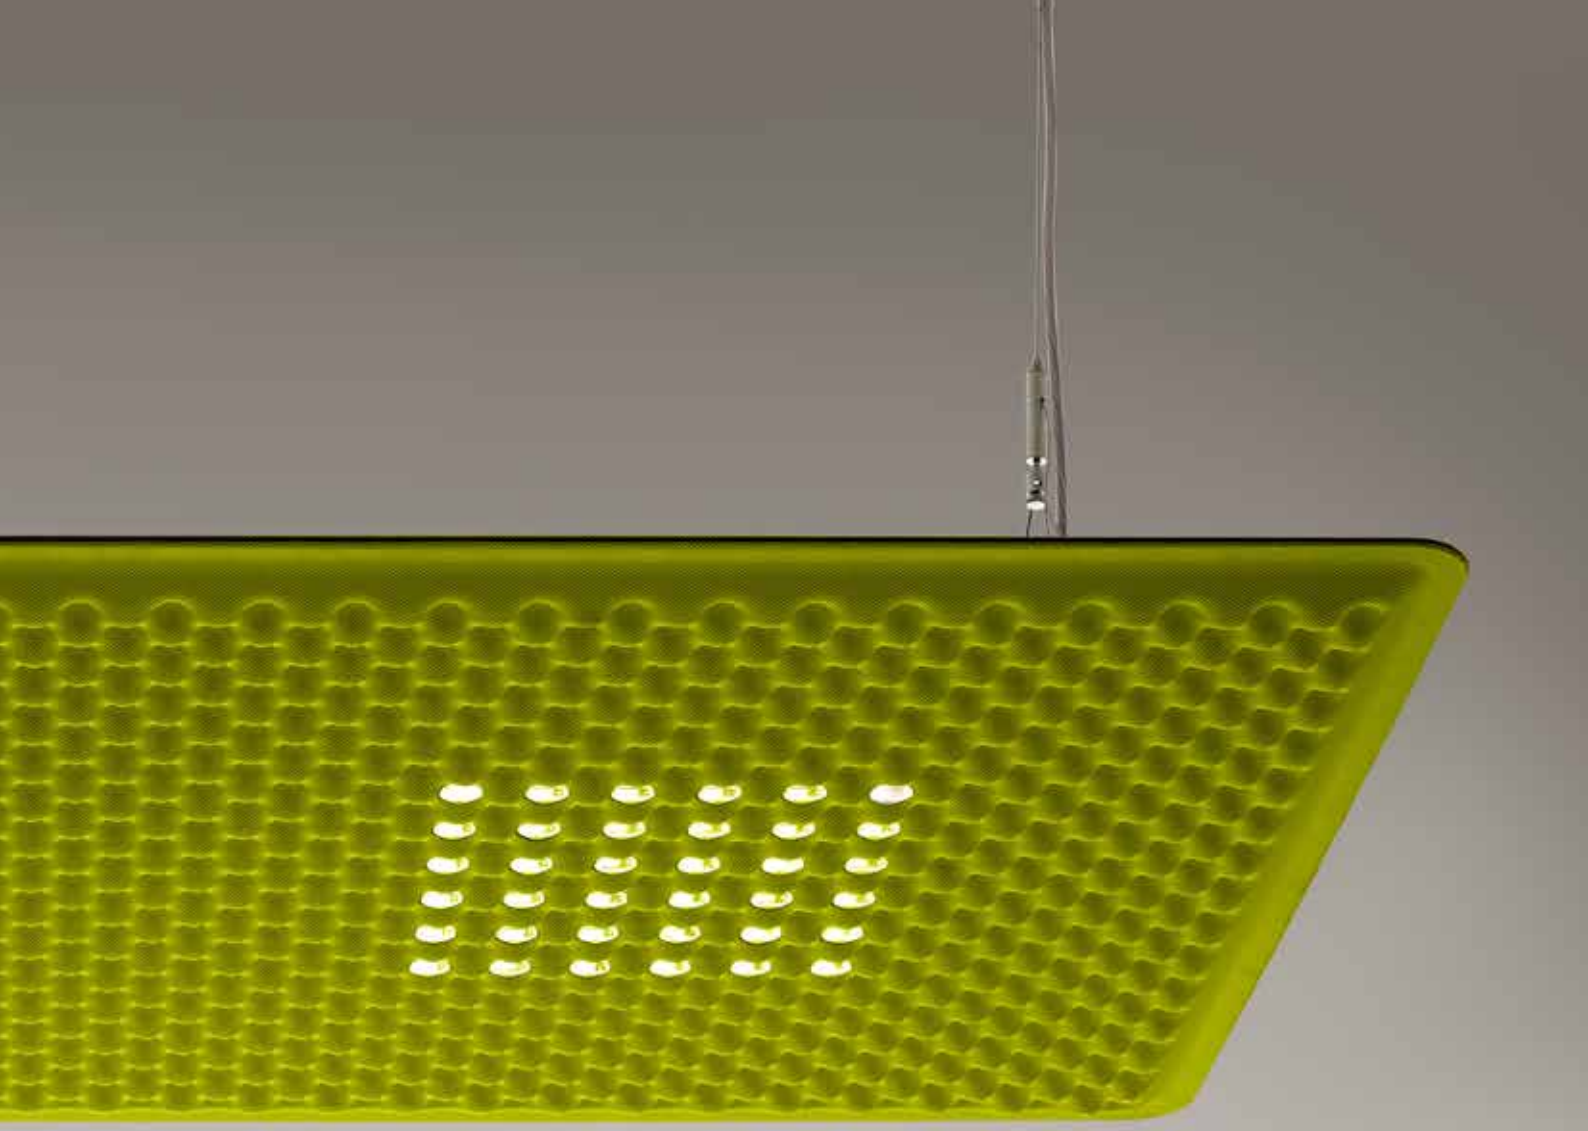
Eggboard Matrix



Suspension appliance with sound-absorbing properties ensured by an unusual sinusoidal cross-section design of the lower surface and the use of a sound-absorbing material.

Acoustic efficiency is ensured within a limited space by positioning at approximately one metre above the head of the speaker and listener.

Direct emission: a board with a high number of low-voltage LEDs ensures maximum lighting comfort.

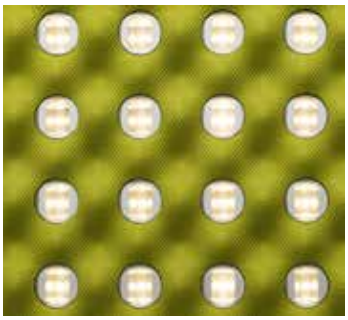
Reflectors can be rotated for use on single or counterposed double desk.

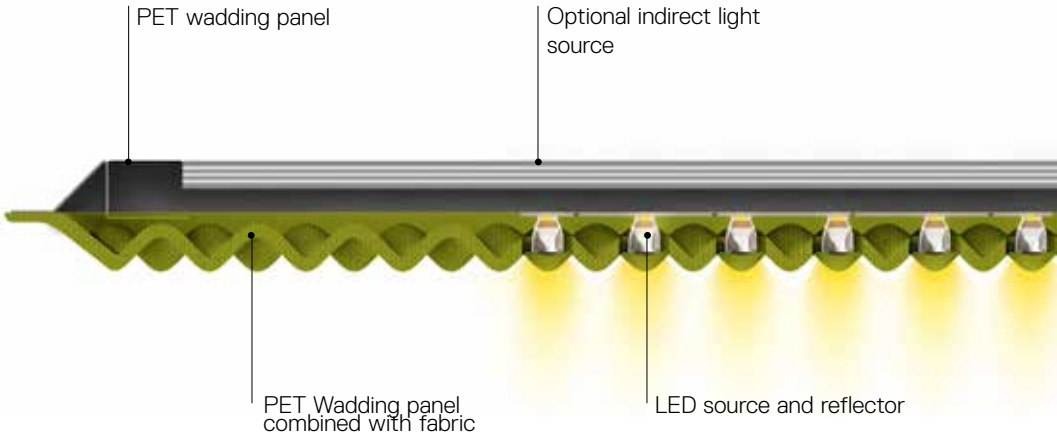
Complies with the norms on office activities that involve the use of video-terminals (UGR<19).

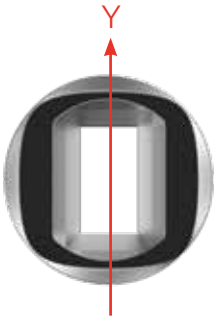
Available in 3 colours (white, grey, green) and 2 different sizes (1600X800mm - 800X800mm).

Giuntini Headquarters, project by and studio architects, Peccioli (PI), I, 2020

EGGBOARD MATRIX 1 DESK

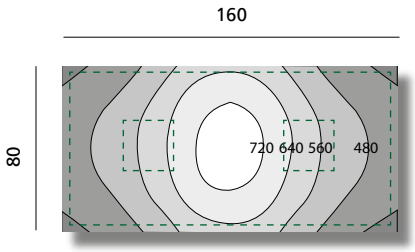




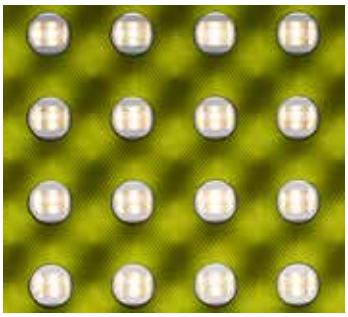


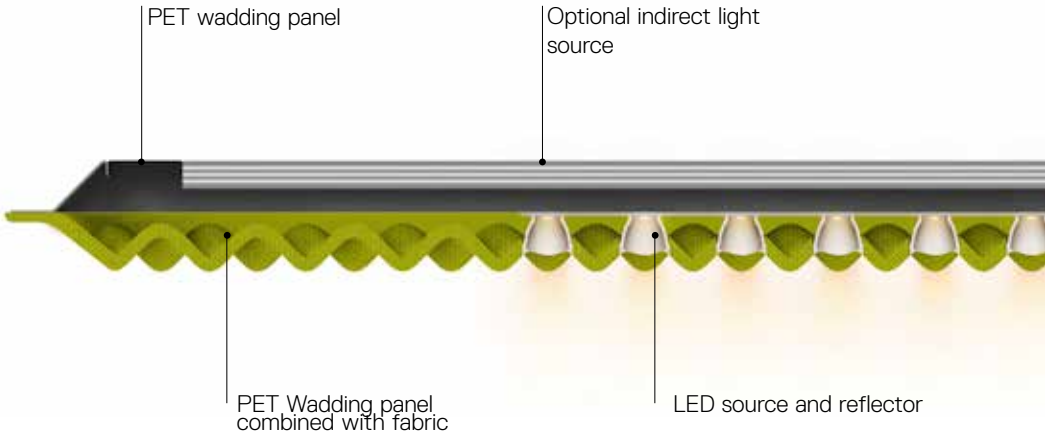
Rotating the elliptic-beam reflector along the Y axis allows to use the product to illuminate one workstation.

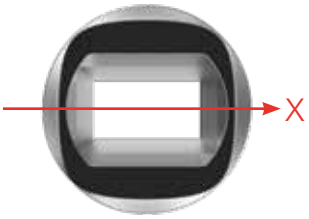
UGR < 12



EGGBOARD MATRIX 2 DESK

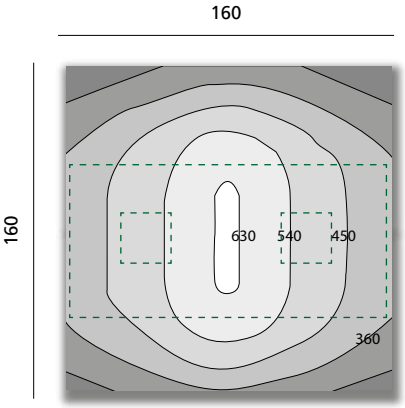


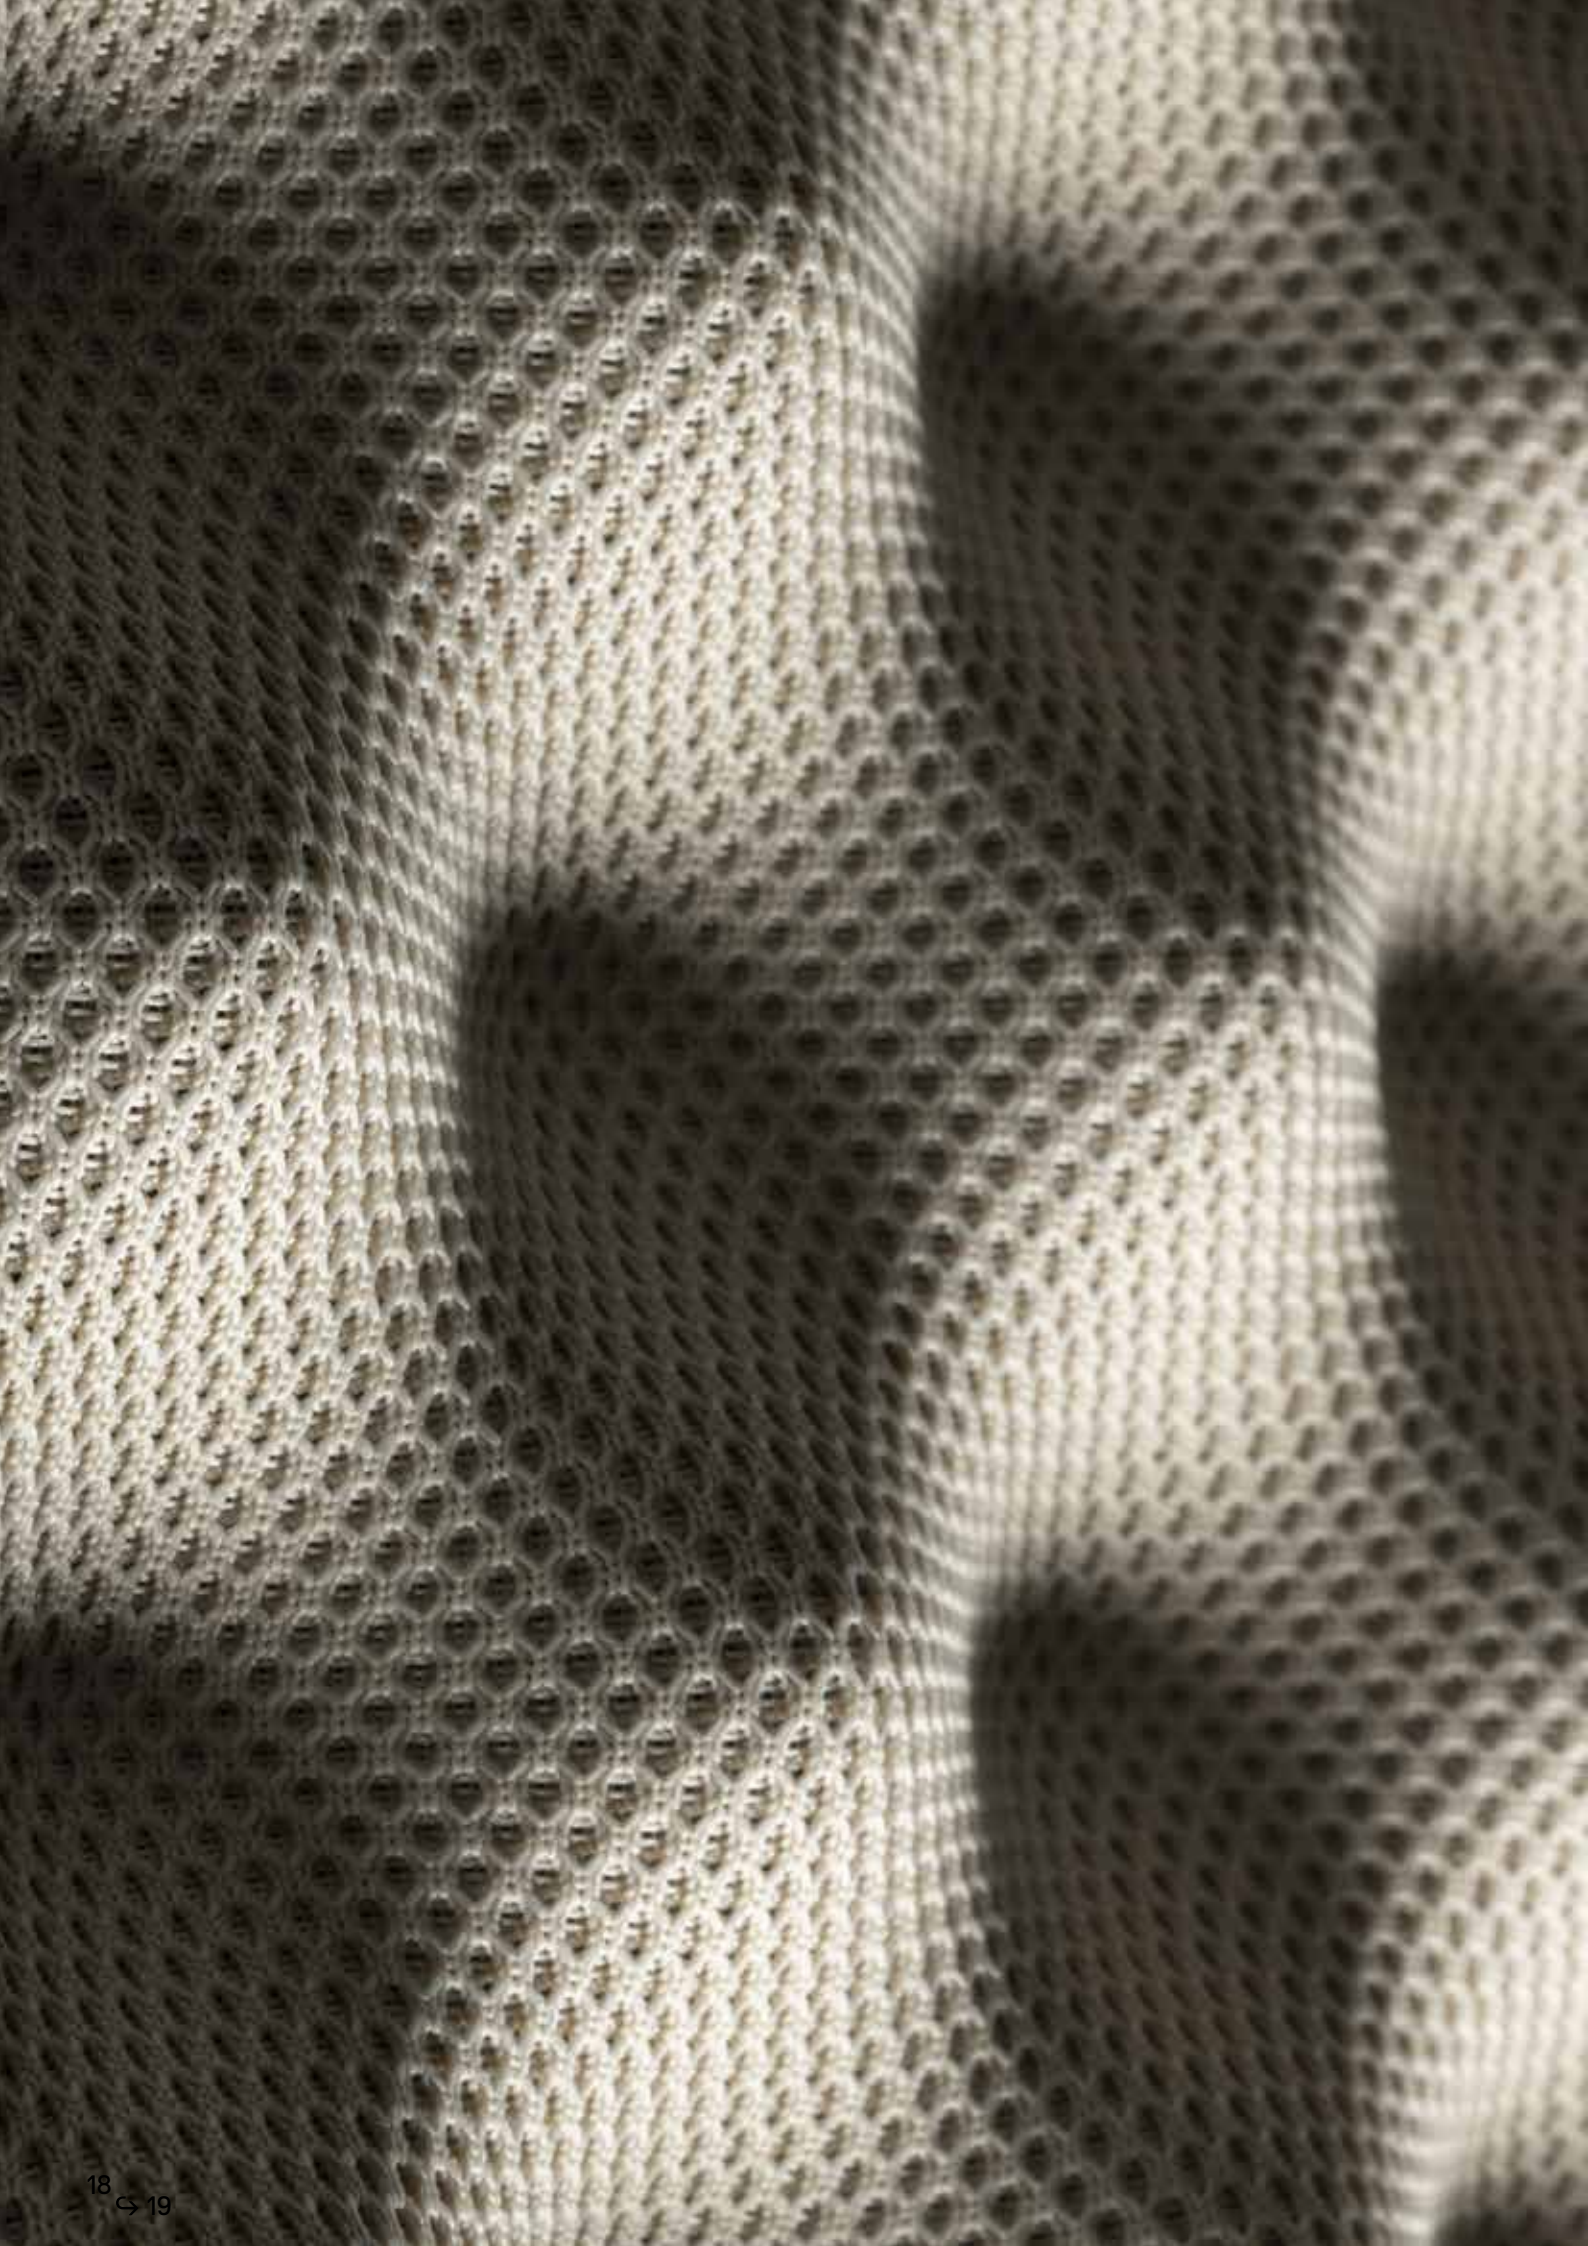




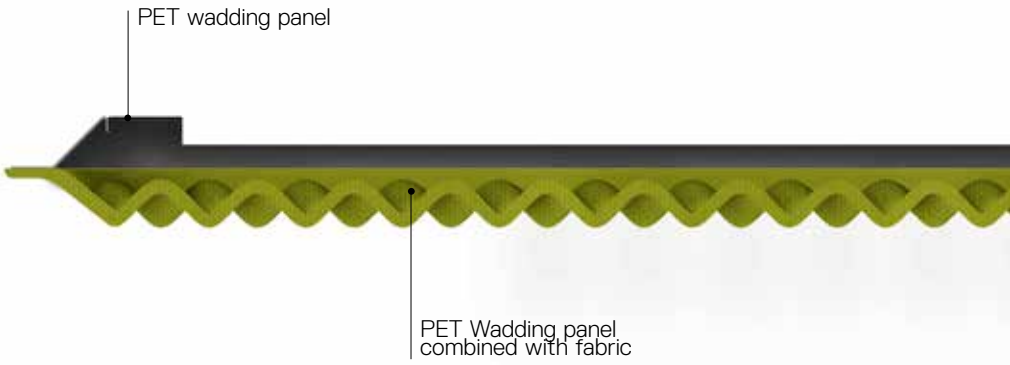
Rotating the elliptic-beam reflector along the X axis allows to use the product to illuminate two workstations.

UGR < 17





EGGBOARD ACOUSTIC PANEL



The sound-absorbing material acts by reducing the reverberation time (i.e. the time required to reduce any noise inside the room by 60 db, so as to ensure that any echoes due to reflections on the walls are inaudible).

The frequency of human voice typically ranges from 1 to 4 kHz.

The use of materials capable to reduce these frequencies allows better understanding of speech and prevents the need to talk loudly to cover the background noise.

The sound-absorbing appliance should be located 400-600 mm off the ceiling to ensure optimal operation.

Eggboard Family is compatible with Artemide App

Artemide App is a user-friendly and intuitive interface used to control individual products, groups of appliances and lighting scenarios. It is a tool that can be associated with several products from both the Design and the Architectural Catalogues.
