INTEGRALIS®

A light for a safe environment

Discovery Space - Ernesto Gismondi Photo by Giovanni Gastel

INTEGRALIS®

AN UNIVERSAL LIGHT TO STAY SAFE TOGETHER

INTEGRALIS® combines sanitizing efficacy with luminous performance and design beauty.

INTEGRALIS® also integrates itself in both the environments and moments of life by interpreting the rhythms and needs of humankind.

INTEGRALIS® was born from Artemide's scientific and technological research and humanistic and social vision.

INTEGRALIS® is an innovative and a sustainable light platform aimed at a conscious and responsible use towards the environment.

01

INTEGRALIS® is sanitizing light

INTEGRALIS® is a project that associates and integrates the visible and invisible spectral range in an innovative formula capable of regenerating the environmental qualities of the space.

INTEGRALIS® is the combination of light emission spectra able to enhance the efficacy of the sanitizing action.

INTEGRALIS® is a light that can act against pathogenic micro-organisms in the environment by just illuminating them.

The INTEGRALIS® selected frequencies of visible light inhibit the development and growth of bacteria, fungi and mold.

The selected frequencies of invisible UV light act on pathogenic micro-organisms, including viruses.

INTEGRALIS® performs in full respect of people's safety and without causing damage to the materials normally present in the space, thanks to the intelligences it incorporates.

PENDING

02

INTEGRALIS® follows the rhythm
of human presence in spaces

INTEGRALIS® works on the concept of "dose".

It infact adapts the intensity of the antimicrobial action according to the rhythm of permanence and absence of people in the spaces.

INTEGRALIS® works on the concept of "time".

A punctual "intermittent" sanitization is activated and deactivated through presence sensors, acting with greater intensity and in less time only in people absence in order to guarantee the safety and the sanitization of the space for each user.

In the same space is also possible to opt for a non-offensive emission acting as a antimicrobial growth containment thanks to the special spectral component of the patented INTEGRALIS® technology.

This approach offers a perfect functional white light which, at the same time, is active against bacteria.

03

INTEGRALIS® is sustainable design

This innovative technology is combined with the quality, expressiveness and beauty of Artemide design.

INTEGRALIS® is integrated into numerous products of the Artemide collection allowing to improve the safety and environmental quality of human life in different context.

INTEGRALIS® is transversal in applications. It creates a light landscape for both personal and collective, public and private environments supporting the human activities following the various permanences of people.

04

INTEGRALIS® is an open platform

Artemide App enables everybody to have an intelligent management of INTEGRALIS® and allows a personal interaction in private and collective spaces.

INTEGRALIS® is a range of 5 lighting solutions that helps humans to live together more safely, while protecting their health.
